CBN	SOP 7.18.1	UNODC Manual, 2009	A

U. - Uncertainty of measurement is expressed as double the standard uncertainty and characterizes the interval value in which it is possible to expect the real value with a probability of 95%.

This uncertainty does not include sampling uncertainty and is not stated for results below the detection level.

A - accredited method

AF (Flexible scope of accreditation): The laboratory is allowed to make a change of the test method regarding the scope of parameters tested, subjects of tests and method performance in the given fields of accreditation provided that the measurement principle is the same.

## Information on specific test conditions or deviations from, additions to, or exclusions from the test method :

n.d. = <0,005 w/w %

Approved on behalf of the laboratory :  
Manager quality - Ing. Olga Janinová

Done in Prague : 29.1.2020
