U. - Uncertainty of measurement is expressed as double the standard uncertainty and characterizes the interval value in which it is possible to expect the real value with a probability of 95%.

This uncertainty does not include sampling uncertainty and is not stated for results below the detection level.

A - accredited method

AF (Flexible scope of accreditation): The laboratory is allowed to make a change of the test method regarding the scope of parameters tested, subjects of tests and method performance in the given fields of accreditation provided that the measurement principle is the same.

Person accepting technical responsibility for the report :

J. Hůlová

Approved on behalf of the laboratory :

Deputy director of laboratory division - Ing. Jiří Nepožitek, CSc.

Done in Prague : 12.2.2020
